

ENHANCED VOICE PROCESSING FOR HEADPHONES

VoiceDefender™

Licensable software for processing voice calls and improving voice control. Assured of being heard whether in the office, gaming, or on the go.

A CRISP CALL EVEN WITHOUT MICROPHONE BOOM!

VoiceDefender BLOCK DIAGRAM

VoiceDefender employs adaptive directional beamforming on 4 microphone signals (2 per ear). A combination of end-fire and broadside beamforming is used to create a single enhanced output, providing a personal zone of voice preservation even in noisy environments.

Available on a variety of DSP/MCU cores.
